Summary

Aspiring Full Stack Developer and B.Tech Graduate with hands-on experience building real world web applications, RESTful APIs, and responsive UIs. including a commercial application and a Redux-driven food delivery platform, Proficient in MERN-Stack technologies and problem Solving. Passionate about writing clean, scalable code and delivering intuitive user experiences.

Work Experience

Java Developer Intern

July 2025 – Sept 2025

Hacked Pvt. Limited, Delhi

- Applied core Java concepts including OOP, exception handling, file I/O, and modular programming.
- Built Java-based mini projects through structured, hands-on training and assignments.
- Strengthened debugging and problem-solving skills using test-driven development practices.

Web Developer Intern

Feb 2024 – Mar 2024

Database Cloud Education & Development, Bhopal

- Developed small-scale web applications using HTML, CSS, and JavaScript.
- Implemented DOM manipulation, event handling, and asynchronous programming.
- Strengthened frontend debugging techniques and browser-based scripting skills.

Skills

Core Programming:	Data Structures & Algorithms fundamentals, Core Java, OOP, REST APIs, Debugging
Front-End:	HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Tailwind CSS, Redux
Back-End:	Node.js, Express.js, MongoDB
Tools & Libraries:	MongoDB Compass, Mongoose, Visual Studio Code, Git, GitHub, Postman, basic AWS & Docker

Projects

Picker Packer & Mover — **MERN Stack, REST APIs** <https://pickerpackernmovers.com/>

- Engineered a full-featured Packers & Movers business website with a responsive UI, integrating service listing pages, inquiry forms, and gallery features.
- Improved website performance through SEO optimization and image compression, decreasing initial page load time by ~1.5 seconds and achieving a 90+ Google Lighthouse accessibility score.
- Designed a REST API backend to process customer inquiries, load-tested to reliably handle 50+ form submissions per minute without server failure.

Portfolio Website — **HTML5, CSS3, JavaScript** <https://shadman1248.github.io/My-Portfolio/>

- Built a fully responsive personal portfolio using semantic HTML5, modern CSS (Flexbox and Grid), and vanilla JavaScript.
- Ensured cross-device compatibility, verifying consistent rendering across desktop, tablet, and 5+ common mobile screen sizes.
- Wrote custom vanilla JavaScript for smooth scrolling and interactive UI elements, avoiding heavy external libraries to keep total page weight under 500 KB for near-instant loading.

Food Delivery Application — **MERN Stack, Redux**

- Architected a responsive MERN application capable of filtering and displaying a mock database of 100+ menu items with minimal perceptible lag.
- Developed REST APIs in Node.js for efficient management of users and orders, tested via Postman to maintain average API response times under 300ms.
- Leveraged Redux for centralized state management, reducing unnecessary React component re-renders by ~20% compared to local component state.
- Implemented real-time updates via WebSockets to transition orders through 4 distinct delivery stages (Placed, Prepared, Out for Delivery, Delivered) with instant UI reflection.

Education

Bachelor of Technology in Computer Science Engineering
Truba Institute of Engineering, Bhopal

2026
CGPA: 8.15/10
